

The Fastest Way To 3k Per Month...

There is so much confusion out there with all the “shiny objects” flying around it’s *hard to know who to believe or what to do*. I’m here to tell you the TRUTH today, in that you **do not** need to be spending your time skipping from opportunity to opportunity.

You need to become really good at one thing and ONE thing only. If I was just starting out or needed to replace a job, I would not mess around with all these “lost opportunities”. [I would simply set up these little profit magnets to generate revenue quickly.](#) Then scale it until I was making more money than with a job.

[Making \\$3,000 per month with this method is not hard to do](#) and the best part is that you are not chained to a desk for 10 hours per day. You would only have to spend 30-60 minutes per day and you could have passive income being paid to you 24/7.

People tend to complicate things and it **does not** have to be that way. If you want to know more about this method, [you can click here for a great little guide I made.](#)

Sometimes we can get so busy with the day to day that we forget the fundamentals. And of course as with anything *it’s the fundamentals that makes the difference.*

Here are some things I learned along the way:

#1. Do a little homework and find a reputable teacher, author or coach that has **proven track record and is a recognized authority in any given area**. I'm referring to real world results, be it in SEO, PPC, product creation, list building, local marketing, social marketing etc.

#2. Your teacher will be able to help you identify a proven, repeatable system which you can model. Choose something you can see yourself doing, something that you can make a connection with. Also, your teacher will be able to *recommend other learning material* that is beneficial, separating the gold from the crap.

#3. Once you identify a suitable mentor make every effort to learn everything you can from them from their free information, low priced paid guides up to the coaching and consulting options. Make this investment in yourself, believe me in the long run you'll save a lot of time and money. This approach is more productive than chasing every new miracle of the week.

#4. Don't try and learn everything all at once, it's overwhelming. Absorb what material you can, take baby steps – but do get moving. For example, I'm not an expert coder but I'm an expert at manipulating code for the purposes of SEO. I know what I need to know and leave the rest to experts I can hire cheaply.

#5. Know that by doing you will **find your own style and discover alternative angles of profitability that you could not have planned for in advance**. For example, I know from experience when I try and speculate in advance how a product will sell, I'm almost always wrong, for better or worse – only by “doing” was the truth revealed.

#6. Be realistic in your expectations and treat this as a real business. Remember it is sometimes discouraging what you can accomplish in 3 weeks but it's amazing what you can do in a year!

#7. STOP buying every shiny product that comes out, STOP participating in boring webinars, STOP taking advice from unqualified wannabes and unsubscribe from ALL the distracting email lists.

#8. Do not get caught *making busy work* but never really accomplishing anything. It all comes down to spending your time on high priority activity that will directly make you money. Only work on tasks that have to do with **building traffic, acquiring leads, product creation or JV possibilities and outsource the rest**. Know in advance what you are going to work on. List 5 high priority tasks on a 3x5 card and accomplish these first. If you do not get through them add to them to the next days list.

#9. It's what you do consistently that makes a difference, make an effort with whatever time you have to work your plan everyday – even

if its baby steps it's progress none the less. Make steady consistent effort executing your plan, noticing what's working and what's not, tweaking it along the way.

#10. If you want to succeed with IM you must be 100% committed. This can't be something *you wish you could do, or hope to do*— **it has to be a must.** What makes you tick and what makes me tick is different, we both have different motivation. You need to write down a goal in detail with emotional intensity and visualize how this would make you feel when you achieve it. This is what will motivate you to move forward.

The key to it all - always strive for quality and make every effort to Add value! Don't get caught trying to scheme how you can make a dollar or two, if this is your mindset, believe me you will end up giving this back one way or another. Try your best to add value and by doing so you will make more money as a result.

Please be one of the few that sees things through. Once you establish yourself and start earning enough money online to sustain your lifestyle the freedom you'll experience is incredible! Even though my online ventures have made me a lot of money over the years *you would not believe it if I told you* all of the things I have tried along the way and the countless times I wanted to or *should have* given up.

Help Is Here If You Want It...

You do not have to do it alone. You can skip the hours of frustration, overwhelm, painful trial/error [and get right to making money](#). When you know what to do and how to do it with complete clarity you will see that this Internet stuff is not so hard.

New subscribers are always telling me, "*I see people making money right and left, they make it seem so easy*". If you are one of those that has tried but never has been able to consistently make money, then you should know that it's usually *just a few small tweaks* in your process that can have you spiralling upwards.

The reality is if you don't have someone in your corner that can show you what to do and how to do it then the chances of success are minimal

Thanks for taking the time to read this, I hope it helps you on your journey!

**To your success
Rene.**
